PROJECTS

Booking platform for a wellness studio

↑ Online bookings reached 70% of total and no-shows dropped by half.

A custom booking and payments web app for a multi-location studio.

Problem:

The client lost bookings to phone-only scheduling and no-shows.

Solution:

Built a React + Django booking app with online payments and reminders.

Analytics dashboard for an agency

↑ Saved roughly 20 hours of manual reporting per month.

A client-reporting dashboard aggregating marketing data sources.

Problem:

The agency assembled client reports manually every month.

Solution:

Built a React dashboard with a Python ETL pipeline and scheduled refresh.

E-commerce MVP for a startup

↑ Validated demand with first paying customers and informed the pitch.

A from-scratch storefront and checkout to validate a product idea.

Problem:

A founder needed a working store to test demand before raising funds.

Solution:

Shipped a lean React + Django MVP with payments in six weeks.
